Japanese	3	2

Additional Info

Project #1: Simplify data logging for yield analysis

Achievement:

- Linking up testers with central server for remote monitoring of lot location,
- Maintain data processing program for yield analysis,
- Introduce bar scanning to replace manual lot input.

Project #2: Localization of tester interface

Achievement:

- cost savings, interface time reduction,
- able to setup hardware and software, calibrate, and link data which are compatible with previous system.

Project #3: Introducing laser deburring to replace liquid honing

Achievement:

- abolish liquid honing process with laser deburring,
- recycle machine parts which are about to be scrapped.

Project #4: To design and maintain a personal webpage.

Achievement:

- Managed to get website up and running,
- Learn HTML, CSS, JScript and VBScript along the way.

Availability : Immediately after notice period of 1 month(s)

Miscellaneous

Expected Monthly Salary : MYR 3000 (Negotiable)
Willing to Travel : Moderate (25% to 50%)
Willing to Relocate : Will Consider
Possess Own Transport : Yes
